

Nam Tran Hoang

SOFTWARE ENGINEER · FRONTEND ENGINEER

📞 (+84) 787-620-942 | ✉️ hggnomm.dev@gmail.com | 🏠 hggnomm.space | 🔗 LinkedIn | 🐙 Github

Frontend-focused Software Engineer with experience in fullstack development and a passion for building fast, scalable, and user-friendly web applications. I enjoy solving complex problems through clean, maintainable solutions that improve performance and create seamless user experiences.

WORK EXPERIENCE

Full Stack Developer

1/2026 – Current

IPELLIO

Da Nang, Vietnam

- Communicated directly with **Australian clients** and cross-functional teams in an **English-speaking environment** to gather requirements and deliver web applications tailored to business needs.
- Worked on legal and intellectual property platforms involving trademark analysis, brand verification, and **multiple third-party API integrations**.
- Applied AI-assisted engineering practices to develop **reusable and scalable frontend systems** for data-heavy legal platforms, improving development efficiency, maintainability, and application performance
- Tech Stack: Cursor, Claude, Next.js, React, Python, FastAPI, PostgreSQL, Redis, Docker, AWS.

Front End Developer

1/2025 – 12/2025

SISU Network

Remote

- Focused on building a highly scalable frontend architecture by designing modular, **reusable component systems** shared across both desktop and web applications.
- Engineered performance-driven desktop interfaces (React/Electron) integrated with **AI-powered features**, including local file attachment and text summarization modules.
- Built and shipped a high-performance **browser extension**, establishing robust data communication between web contexts and desktop background workflows.
- Tech Stack: Cursor, Claude, React, Electron, TypeScript, Tailwind CSS, Node.js.

Full Stack Developer

6/2023 – 12/2024

FPT Software

Da Nang, Vietnam

- Worked on a Knowledge Base System with AI-powered search to improve document accessibility and accelerate onboarding processes across departments, increasing internal work efficiency by up to 70% and reducing operational costs by 35%.
- Contributed to an Applicant Tracking System handling candidate communication, career pages, and hundreds of monthly job postings, helping streamline recruitment workflows and improve HR performance.
- As a key contributor, proposed UI/UX improvements and participated in implementing CI/CD processes to enhance product usability and development efficiency.
- Tech Stack: ASP.NET Core, TypeScript, React, Redux, Ant Design, MySQL, AWS, Azure, Docker, IIS.

Full Stack Developer Intern

2/2023 – 5/2023

FPT Software

Da Nang, Vietnam

- Assisted in developing the Applicant Tracking System by contributing to UI implementation and improving overall usability.
- Researched and implemented a basic CI/CD pipeline for a dummy RESTful API project to better understand deployment workflows and system architecture.
- Collaborated with cross-functional teams and provided support to ensure smooth and timely project delivery.
- Tech Stack: ASP.NET Core, TypeScript, React, Redux, Less, MySQL, Azure DevOps, IIS.

EDUCATION

Computer Science Engineer

Vietnam-Korea University of Information and Communication Technology

- GPA: 3.2/4.0
- English B2
- Goal
 - Best Web Design (BWD 2022) – Reached the Final Round
 - Graduation Thesis: 8.7/10

2021 – 2026

Da Nang, Vietnam

SKILLS

Programming Languages	TypeScript JavaScript C# Python HTML CSS
Frameworks/Libraries	React.js React Native Next.js ASP.NET FastAPI Tailwind CSS Ant Design
AI Tools	Cursor Claude OpenAI Google Antigravity
Others	AWS Azure SQL NoSQL Docker Figma Git Linux CICD
Languages	English
