

Nam Tran Hoang

SOFTWARE ENGINEER

☎ (+84) 354-402-072 | ✉ hggnomm.dev@gmail.com | 🏠 hggnomm.space | 🔗 LinkedIn | 🐙 Github

Software Engineer with 3 years of experience building production web applications with React, Next.js, and TypeScript. Experienced in full-stack development, performance optimization, API integration, and AI-assisted development.

WORK EXPERIENCE

Full Stack Developer

1/2026 – 7/2026

IPELLIO

Da Nang, Vietnam

- Developed and maintained a data-intensive legal/IP platform supporting trademark analysis, brand verification, and brand asset discovery.
- Designed reusable **frontend components** from Figma, and data-driven UI systems to improve **maintainability** and speed up feature development for a team.
- Communicated directly with **Australian clients** and cross-functional teams in an **English-speaking environment** to get requirements.
- Optimized media-heavy pages by implementing **lazy loading**, **infinite scrolling**, and backend optimizations to reduce unnecessary data loading and improve page performance.
- Managed system operations and deployments through **CI/CD pipelines**, including domain and **DNS configuration** with GoDaddy for production products.
- Tech Stack: Cursor, Claude, Next.js, React, Python, FastAPI, PostgreSQL, Docker, AWS.

Front End Developer

1/2025 – 12/2025

SISU Network

Remote

- Implemented responsive UI and reusable interaction patterns using **React**, **TypeScript**, **Tailwind CSS**, and **Node.js**.
- Designed and maintained a frontend architecture with reusable React components shared across desktop and web applications.
- Collaborated with cross-functional teams to investigate technical issues, refine requirements, and deliver production features.
- Tech Stack: Cursor, Claude, React, Electron, TypeScript, Tailwind CSS, Node.js.

Full Stack Developer

6/2023 – 12/2024

FPT Software

Da Nang, Vietnam

- Developed a **Knowledge Base System** with AI-powered search to improve document and increase internal work efficiency by up to **70%** and reducing operational costs by **35%**.
- Contributed to an **Applicant Tracking System** handling candidate communication, career pages, and hundreds of monthly job postings.
- Improved product usability and UI/UX and contribute to CI/CD processes for more step development workflows.
- Tech Stack: ASP.NET Core, TypeScript, React, Redux, Ant Design, MySQL, AWS, Azure, Docker, IIS.

Full Stack Developer Intern

2/2023 – 5/2023

FPT Software

Da Nang, Vietnam

- Assisted in developing the Applicant Tracking System by contributing to UI implementation and improving overall usability.
- Researched and implemented a basic CI/CD pipeline for a dummy RESTful API project to better understand deployment workflows and system architecture.
- Collaborated with cross-functional teams and provided support to ensure smooth and timely project delivery.
- Tech Stack: ASP.NET Core, TypeScript, React, Redux, Less, MySQL, Azure DevOps, IIS.

EDUCATION

- GPA: 3.0 / 4.0
- Achievements
 - Best Web Design (BWD 2022) – Reached the Final Round
 - Final Graduation Thesis: 8.7/10

TECHNICAL SKILLS

Languages	TypeScript JavaScript C# Python Java SQL
Frontend	React Next.js Tailwind CSS Ant Design
Backend	Node.js FastAPI ASP.NET Spring Boot
Tools	Cursor Claude OpenAI Google Antigravity Figma Git
Cloud & DevOps:	AWS Azure Docker Linux CICD
Languages	English
